Education

Rochester Institute of Technology

Aug 2024 – Dec 2025

MS in Data Science

- **Coursework:** Fnd. Data Science & Analytics, Software Construction, Software Eng. for Data Sci., Visual Analytics

PSG College of Arts and Science

Aug 2020 – May 2023

BSc in Computer Science with Data Analytics

- **Coursework:** Machine Learning, Artificial Intelligence, Data Mining, Predictive Analytics, Big Data Analytics

Technologies

Languages & Frameworks: Python, SQL, R, Java, JavaScript, Flask, PyTorch, TensorFlow, Scikit-Learn, Keras

Tools & Platforms: Azure ML, Git, Docker, Jupyter, Google Colab, SPSS

Big Data & Databases: Apache Spark, MySQL, Hadoop, MongoDB

Visualization & Modeling: Power BI, Tableau, QGIS, ArcGIS, Scikit-learn, Pandas, NumPy, Streamlit

Statistical & ML Frameworks: Hypothesis Testing, Time Series Forecasting, Regression

Experience

Intern: Analysis & Design of Commissions for Gig Workers

Chennai, India

One Integral Technologies Pvt. Ltd.

Jan 2023 – Jul 2024

- Designed and optimized performance-based pay models using Digital Twin technology, improving incentive structures and boosting worker engagement by 15%.
- Developed a real-time analytics dashboard using React.js to visualize worker performance and commission metrics, improving decision-making for managers.
- Integrated the dashboard with the Digital Twin system, enabling live updates and predictions into worker incentives.

Projects

Bias in AI Travel Narratives: Indic vs. Western LLMs (Ongoing)

2025

- Collecting YouTube data and evaluating counter-speech from Indic and Western LLMs on Indian travel biases.
- Analyzing fairness using zero-/few-shot prompting and thematic classification to detect cultural bias.

Kafka-Based Credit Card Transaction Processing System

2025

- Built a Kafka-based Lambda Architecture pipeline for real-time credit card transaction validation and batch credit score recalculations.
- Developed modular Python + SQL data pipelines integrating MySQL with Kafka for streaming and batch updates.

AI Recipe Generator

2024

- Developed a React-based web app that uses OpenAI's text-davinci-003 model to dynamically generate unique recipes based on user-provided ingredients.
- Integrated real-time AI responses, enhancing user engagement by offering personalized cooking suggestions.

Amazon Sales Analysis Dashboard

2024

- Designed an interactive dashboard using Power BI to analyze Amazon sales data; Managed and processed a large dataset to uncover insights.
- Utilized MySQL to load, clean, and join multiple datasets, preparing data for efficient analysis and reporting.

Certifications

Microsoft Azure AI Fundamentals (AI-900) - Coursera / Microsoft

2025

Post Graduate Program – Data Science, VIT Bengaluru

2024

Foundation in Programming and Data Science, IIT Madras

2022

Leadership & Activities

Club Lead, Google Developer Student Club

2021 - 2023

Organized intercollegiate tech-fest during undergrad (200+ participants)

2023
